

Archie

From Cambric Systems

FREE TRIAL!

Secure Image Transfer for GP practices and clinics

Archie from Cambric is an easy-to-use app that enables healthcare professionals to capture images using their own smartphone, transfer to their local system for attachment to a patient's electronic record or send on via other existing clinical systems to specialist services, such as dermatology.

How does it work?

- 1 Using the Archie smartphone app, scan the QR code in the Archie folder on your PC – this sets up a secure session between your smartphone and your PC

- 2 Capture images using the Archie app on your smartphone

- 3 Your images are securely & automatically transferred to your PC's Archie folder and at no point stored on your smartphone

- 4 View images on your PC. Attach to electronic patient records, referrals and other clinical systems

- 5 Once you have finished attaching and transferring your images on the PC, simply press 'DONE' in the smartphone app to securely & permanently remove the images from the Archie folder on your PC.

JOIN OUR EARLY ACCESS PROGRAMME !

Archie is currently in the beta testing phase and not yet publicly available. If you would like to help shape the solution through our early access programme, we would invite you to register for the free Archie beta test programme.

Simply visit our website and complete the short form to register your interest!:
